Advantages for your production: Full tracking and increased safety.

More information
High performance with a wide range of solutions and options.

Product description

The BRAIN2 Stock_Control app lets you exactly record incoming goods and materials. Important data such as weight, quantity or shelf-live are centrally managed. Reduce your effort for material verification to a minimum. Stored master data on internally created labels make it possible. For easy verification you just enter a goods receipt number in the production or scan a barcode. By means of the BRAIN2 Stock_Control app you can automatically mark incoming goods for quarantine until they are released again by your quality management.

Functional features

– Manual input or weighing of stock
– Verification of goods in the process
– Blocking of goods requiring quarantine
– Stock information during order creation
– Creation and management of supplier data
– Article maintenance
– Stock use
