... Bizerba Electronic Scanner Scales CS 300 NC 74 ...

The scanner you already have at the cash-till can do more than just read barcodes. By combining it with Bizerba check-out scales it enables goods to be weighed and priced exactly in a single, small footprint solution.

## Scanning and weighing in one operation

The check-out scales CS 300 NC 74 can be integrated into the cash-till scanner NCR NC 7874 in just a few steps. The basic price – with or without tare – is transmitted from the cash-till to the scales, which then calculates the sales price based on the weight. Weight, basic price and sales price are then transmitted to the calibratable sales slip printer. If the till application is equipped with a certified Bizerba software driver you can also save on a separate display for the scales, as all the data can immediately be shown temporarily or permanently on the till display.

## The quick and easy way to a complete solution

The Bizerba weighing system consists of the following components:

- System framework for load cell and related electronics
- Load carrier for receiving the scanner plate
- Single-side or double-sided display<sup>1)</sup> for weight, basic price, sales price, tare and article text<sup>1)</sup> or just single-sided for weight
- RS 232 interface with 9-pin data cable and SUB-D plug for data connection to till (adjustable dialogue)
- RJ 45 for connecting displays and operating units

### Weighing range

- 6/15 kg

### Scale division

- 2,5 g

### Minimum load

- 40 g

### Resolution

- 2 x 3000 d

### Basic price fraction

- 0,01

### Basic price display

- 6

### Sales price fraction

- 0,01

### Sales price display

- 6 digits

### Data output

- Serial interface RS 232  
Data protocol for check-out function

### Zeroing function

- Directly in head of display

### Display

- Separate single-sided /double-sided<sup>1)</sup> on stand or support for weight, basic price, sales price, tare, (article text<sup>1)</sup>), Separate single-sided on stand or support for just weight, Customer-specific ¼ VGA cash-till displays

### Other features

- Built-in spirit level to confirm horizontal position, display can be installed in the check-out area for viewing by customer or cashier.

### Load cell

- Strain gauge

### Temperature range

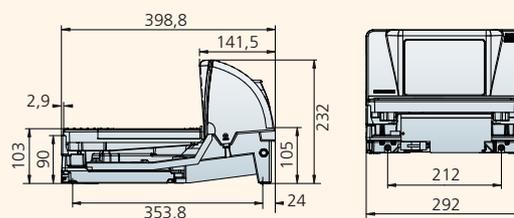

- -10 °C to + 40 °C

### Operating voltage

- The voltage supply for the scales is taken directly from the scanner

### Weight

- Scales, including single-sided display approx. 3.1 kg  
Complete with scanner approx. 7.2 kg

<sup>1)</sup> Option

Single-side or double-sided display for weight, basic price, sales price
