

Product Sheet

RetailApp

BIZERBA

RetailApps – small units of functionality with major impact.
These useful applications supplement the RetailPowerScale scale solution and combine individuality with the advantages of standard software.
Modular design, readily available, at an attractive price.

More information
High performance with a wide range of solutions and options.

EasyTracing

Easy administration of origin data: Link one or several lot numbers to sales articles with the RetailApp EasyTracing.

The RetailApp EasyTracing allows administration of various lot numbers for one article. Data can be forwarded to the scale via host systems. As an alternative, these can be input directly on the scale via scanning. If only one lot number is available for the sales article, it is recorded automatically. In case there are several lot numbers, the corresponding number can be selected from a selection list. Fast and effective management of origin data with EasyTracing.

Functionalities

- Supplying of the host system (RetailPowerScale database) or maintaining lot number on the scale (RetailApp database)
- Linking of a single lot number for automatic recording in the sales process
- Automatic display of a selection list if several lot numbers are linked to the item

Benefits

- Fast and easy administration of several lot numbers directly at the scale
- Automatic recording of the lot number for the sales article for guaranteed traceability
