Data Sheet
PC terminal iS65

BIZERBA

A full-value industry PC - lean, robust, good-looking and made for the rough environmental conditions of the industrial daily routine, the iS65 terminal functions for tasks like information, managing or data input.

More information
High performance with a wide range of solutions and equipment variants.

Product description

Due to its outstanding design and the integrated Atom CPU, the iS65 presents itself as a perfect solution for client applications, either as a terminal for information, managing or data input.

Questions like "How is the status of the critical order?" or "How is the current machine running time?" find answers thanks to this device.

On this industry PC fitted with 15" touch screen, without ventilation and matched with production requirements, your client software BRAIN, e.g. monitoring, can be easily installed. Thus the iS65 provides you with all operating figures you need for an efficient corporate management.

iS 65

Highlights

– 15" touch display with resolution 1024 x 768 pixels
– IP65 - all-round protection against dust and humidity
