

Data sheet

PC terminal iS70

BIZERBA

The iS70, made of stainless steel with optional weighing technology, withstands the rough environmental conditions of the industrial daily routine. Due to its touch display the device is the optimal terminal for weighing, dosing, counting, controlling, managing and data input.

More information
High performance
with a wide range
of solutions and
equipment variants.

Product Description

In its starter variants the industry PC provides displays with resistive touch technology in two sizes. Moreover, Bizerba offers the new GFG (Glass-Film-Glass) technology. With its top glass it is optimally protected against chemicals and scratching. Even a chain glove can't do any harm to this display .

The iS70 is arrayed by means of a foot, a post or montage on the wall with the integrated VESA 100 retainer.

Its fully integrated WLAN solution can be easily added in the field.

Furthermore, the new cable conduit allows the use of standard cables without restraining the declared protection class.

PC terminal iS70

Highlights

- Active color TFT-LCD display with LED backlighting
- 15.4" display with 1280 x 800 pixels
- 19" display with 1280 x 1024 pixels
- CPU Intel Celeron 847E 1.1 GHz
- 4 GB RAM
- 32 GB SSD mass storage
- A number of interfaces like Ethernet 10/100/1000 Mbit, serial interface, USB interfaces
- NT-Scale: various display models like full screen display with net, tare and gross weight, standard display with net weight and connected windows on the top, on the sides or on the bottom

iS70 with load receptor

iS70 with GFG technology

Options

- 120 GB SSD data storage
- Internal WLAN radio module
- Galvanically separated serial interface
- Foot / post
- NT-Scale software with up to three connected scales
- Calibratable data storage via _connect.BRAIN
