## RetailApp

# BIZERBA

**RetailApps – small functional units with major impact.**  
**These useful applications supplement the scale solution RetailPowerScale and combine individuality with the advantages of a standard software.**  
**Modular design, readily available, at an attractive price.**

**More information**  
High performance with a wide range of solutions and options.

## PaperNearEnd

No more end of paper: Avoid empty label rolls on your scales, particularly in unattended self-service areas by means of the early warning system of RetailApp PaperNearEnd.

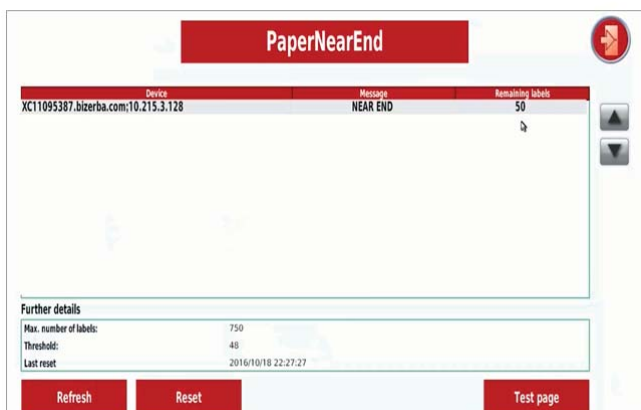

RetailApp PaperNearEnd signalizes when a scale's label roll is empty. Warning signals may be sent via e-mail, be displayed in the central monitoring or be visualized via a visual signal of an USB lamp. A combination of all three notification types is possible. Once an individually configurable threshold value has been reached, the RetailApp issues a warning before the label roll is empty. Depending on the end of paper status different notifications are sent. Higher availability of the scales due to PaperNearEnd.

### Functionalities

- USB lamp connection for visual signals
- Notification of label roll status via e-mail
- Monitoring function for displaying the current status
- Early warning system before a label roll is empty – alert threshold configurable

### Benefits

- Early warning prior to end of paper possible
- Higher availability of the scales
- Increased customer satisfaction due to less down times of self-service scales
