a wide range of
solutions and options.

PaymentManager – CashManagement

Easy connection of payment systems: Integrate payment systems in your selling process and process payment transactions in an easy and transparent manner via the RetailApp PaymentManager.
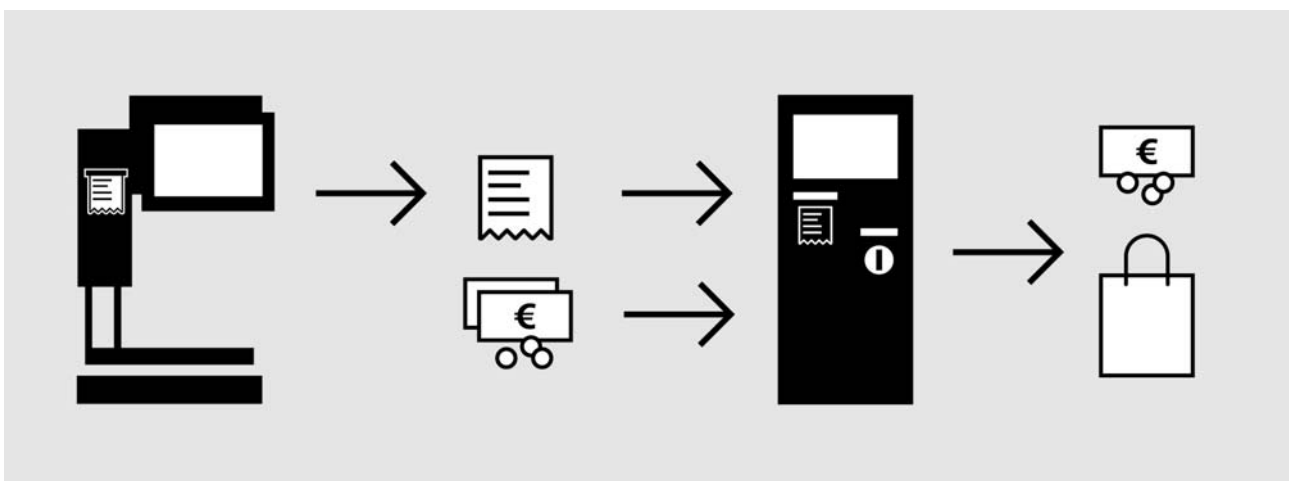

The RetailApp PaymentManager connects various payment systems to Bizerba PC scales. CashManagement integrates payment machines in the payment process of the PC scale software RetailPowerScale. With this CashManagement system, operators no longer get in direct contact with cash. The system can count bills and coins and automatically issues the amount of change to be given back to the customer. During the payment process, the current transaction status is directly shown on the scale's operator side. No direct contact with cash for hygienic operating processes.

Functionalities

– Connection of payment machines to PC scales
– Status messages directly on the scale
– Easy operation due to direct integration in the
  RetailPowerScale payment process
– Management and additional functions menu available

Benefits

– Expansion of payment options in the market
– Immediate connection of already released payment
  terminals possible
– No contact with cash for hygienic operating processes
