

Product Sheet

RetailApp

BIZERBA

RetailApps – small units of functionality with major impact.
These useful applications supplement the RetailPowerScale scale solution
and combine individuality with the advantages of standard software.
Modular design, readily available, at an attractive price.

More information
High performance with
a wide range of
solutions and options.

PowerQueue

Optimum use of waiting times: Manage waiting times and queues at the fresh food counter with the RetailApp PowerQueue and enable your customers to optimally use their shopping times.

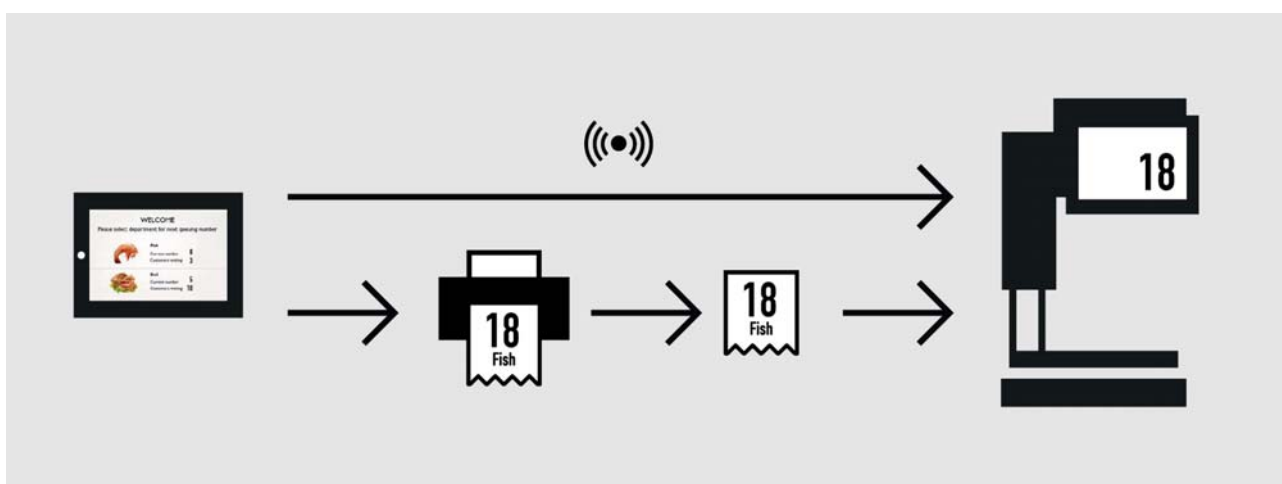

The RetailApp PowerQueue provides a queuing solution which optimizes the service processes at fresh food counters. Various queuing sections can be defined and simultaneously supplied with queuing numbers by one and the same printer. The queuing information for customers can be shown on the customer display of the scale as well as on external screens and be integrated into existing advertising structures. Moreover, audio files for acoustic signals for forwarding to the next queue number can be integrated. PowerQueue for perfect organization at fresh food counters.

Functionalities

- Queue number via RetailPowerScale mobile devices can be printed by means of RetailApp PowerQueuePrint
- PowerQueuePrint combinable with info terminal
- Connection of printer terminal Asura by Star as well as of manual number dispensers possible
- Displaying of queuing information on the customer side of the scale and on external screens
- Integration of acoustic signals possible

Benefits

- User-friendly and individually designable interface
- Use of existing advertising spaces for integrating the queuing information
- Various queuing sections controllable via one and the same printer
- Effective organization at the fresh food counter
