Product Sheet
RetailApp

BIZERBA

RetailApps – small units of functionality with major impact.
These useful applications supplement the RetailPowerScale scale solution
and combine individuality with the advantages of standard software.
Modular design, readily available, at an attractive price.

SelectionComposer

Easy handling of product assortments: With the RetailApp SelectionComposer you can process individual product assortments on the scales.
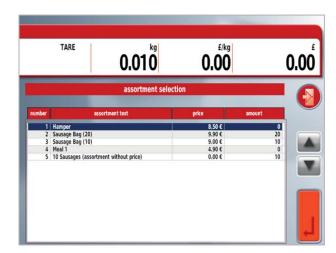

The RetailApp SelectionComposer allows registration of a complete assortment by pressing a single key. Whether gift baskets or other ideas – define ahead and simply register. A total price may be assigned to each assortment. Special prices for assortment sales are shown on the customer display. All article types in the assortments may be used– inventory management is still ensured. With SelectionComposer product assortments are clearly arranged on the scale.
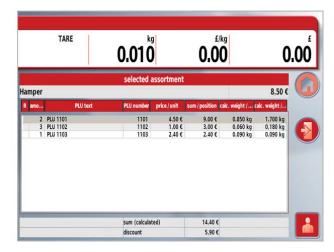

Functionalities

– Three types of assortments are supported:
  - Fixed product assortment
  - Product assortment with VAT selection, e.g. for lunch offers
  - Product selection from a predefined assortment

Benefits

– Easy assortment management and easy processing on the device
– Discounts and savings directly visible
– Display of savings information also on customer display available
– Correct inventory management
– Quick registration via a single keystroke
