

Data Sheet

_counting.BRAIN

BIZERBA

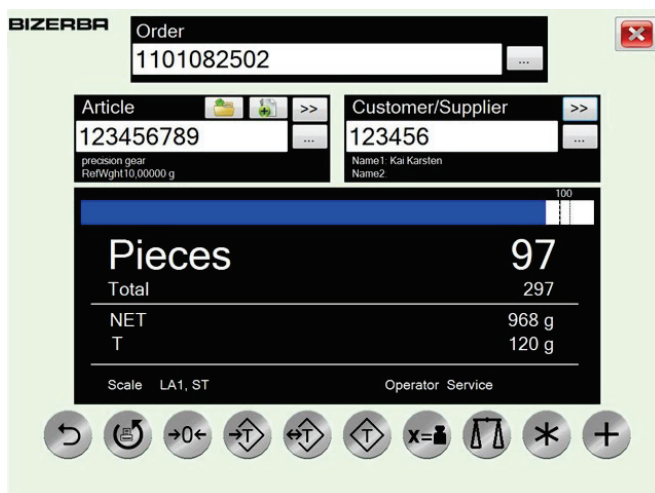

You are on the right track - whether in goods receiving, commissioning, shipping, or during inventory, the software _counting.BRAIN always determines the correct amount. Due to the intuitive touch application you automate and optimize your counting processes.

The software _counting.BRAIN optimizes counting processes.

With _counting.BRAIN you increase the efficiency of your counting processes thanks to central article master data with stored reference weights.

The weighings and the determined quantities are stored directly in the central SQL database in the network. The tolerance limits for the predefined target quantity can be deposited for each article and are intuitively and quickly recognized due to the bargraph.

Moreover, users need no special training, thanks to the user friendliness of the system with its integrated intuitive touch operation.

Highlights

- Easy counting as well as counting according to orders (optional), comfortably managed at the PC workplace
- No limitation to connectable PC workplaces in the network
- Minimizing of false or too high delivery volumes according to quantity determination
- Savings of costs and time due to quick and exact quantity determination
- Consistent quality due to check by tolerance limits
- Central evaluation of stored counting processes

Product benefit

The software _counting.BRAIN enables potential savings of costs and time thanks to its high precision, immediate weight recognition and precise quantity determination.

Tracing in case of complaints is done by storage of data from quantity determination.

Functions

- Quick and precise counting processes
- Optimal quantity determination
- Central master data maintenance and storage of quantity determination
- Simple intuitive operation via touch application

Licence overview

Benefits & Features

		Basic	Standard	Enterprise
Basic functions				
	Counting with recording of weight at PC workplace	✓	✓	✓
	Master data management (article data, tare data, customer data)	✓	✓	✓
	Touchscreen for counting process	✓	✓	✓
	Access with password control	✓	✓	✓
	Data import and export, from and to the ERP system over ASCII file transfer / or SQL DB, according to BIZERBA data structure	✓	✓	✓
Counting according to order				
	Counting according to order at the PC workplace (not touch)		✓	✓
Counting in automotive industry				
	Creation of VDA labels (KLT + VDA transport label)			✓
	Extended master data management (VDA specifications)			✓
